

American Indian/ Alaska Native Health Disparities Compendium: Gathering of Knowledge

Project Title	American Indian/ Alaska Native Health Disparities Compendium: Gathering of Knowledge
Project Summary	This project aims to collect, catalogue and summarize research products including manuscripts, abstracts, presentation and reports addressing health disparities in American Indian/Alaska Native populations to guide and support the division's research priorities.
Country	United States

Project Description

The Division of Epidemiology and Disease Prevention (DEDP) at the Indian Health Service (IHS) is interested in collecting and recording publicly available products in scientific and gray literature (such as manuscripts, abstracts, presentations) addressing a variety of topics around health disparities among the American Indian/Alaska Native population. The intern will work to conduct literature reviews and catalogue these resources. The intern may develop a queriable database to record and analyze this information. The intern will summarize the information and create a presentation describing the information identified. The intern could also support other division projects including supporting and coordinating the creation of division newsletters, and supporting disease specific workgroup meetings.

Required Skills or Interests

Skill(s)
Analytical writing
Data analysis
Editing and proofreading
Research
Writing

Additional Information

Access to scientific literature is required. Experience with Access database or other database applications is a plus but not necessary.

Language Requirements

None
